

In re Appln. Of: Léon Leclercq
Application No.: Not yet assigned

REMARKS

This Preliminary Amendment amends the Specification to include the claimed priority to perfect applicant's claim of priority to priority applications. We note this is a matter of redundancy as the priority claims are also made in the submitted data sheets.

Applicant also submits this Preliminary Amendment to add amendments that were made during Article 34 of the PCT Application. Applicant further submits this Preliminary Amendment to put the claims in better form for U.S. practice and to save on governmental filing fees relating to multiple dependencies and claim counting. None of the amendments have been made for purposes of patentability, but rather the amendments are made on a voluntary basis without prejudice.

Respectfully submitted,

Andrew J. Heinisch, Reg. No. 43666
